

Ghost Inside My Skin

Pulley

So many sleepless nights I've had
Can't seem to close my eyes
These December days are dark and cold
Makes for a sad day and a long night...

Trapped
Inside
Can't find my way back home
Pretend
I was just a friend
And I wish I could
I wish I would say no
Here I am, I must be watching someone else
And I close my eyes and try to see your face
Someone tell the stars to go away
I'd like the sky real black today
So I can keep the ghost inside my skin

I remember how you try and smile
It's every reason why
All these memories left me in surprise
I'm sorry love treats you so badly

Trapped
Inside
Can't find my way back home
Pretend
I was just a friend
And I wish I could
I wish I would say no
Here I am, I must be watching someone else
And I close my eyes and try to see your face
Someone tell the stars to go away
I'd like the sky real black today
So I can keep the ghost inside my skin

I thought I had all the answers to my life
Everything I knew was wrong
And I thought I had all the answers to my life
Everything I knew was wrong

Wish I could say hello to all my friends
I'd say hello to you again
Wish I could say hello to all my friends
And I'd say hello to you again
And I'd say hello to you again
I'd say hello to all my friends
I'd say hello
