

Back to Love

Pulsedriver

The second you came in the room
You took my breath away
Your eyes shown light the skies
Just say fear was yesterday

Now it's been all on a while
Since I last saw your face
We will once as closest one
But it's so many different ways

Where have you been all this time
When I was looking out for you
'Cause now I've realized
That my love for you was true

Is there a space sometime?
For this lonely heart of mine
Is there a space sometime?
For this silent heart of mine

Was I too blind to see?
When there was more to you and me
Now pray the land from above
To lead me back to love

Is there a space sometime?
Is there a space sometime?
Was I too blind to see?
Now pray the land from above
To lead me back to love
I found my way back to love

You told me to let go
When I want to to hold you tight
For this was out for show
Now I know I wasn't right

My heart it hurts when I
Think of the things I've begun
Can I ever make it up?
Can I ride the roans I've done?

Here we go back to that place
Where we found the love so strong
If I opened up my eyes
I find you in these arms where you belong

Yes, there's a space sometime
For this open heart of mine
Yes, there's a space sometime
For this silent heart of mine

I was just too blind to see

When there was more to you and me
And I thank to lot of us
I found my way back to love

I found my way back to love
Is there a space sometime?
Is there a space sometime?
Was I too blind to see?
Now pray the land from above

To lead me back to love
