

Darkest Dark

Punchline

When it gets hard
Mabye I know where you are
Even in the darkest dark
I'm there with you
I'm there with you
I'm there with you

I feel the blood running through my veins
Got so zoomed out, it's all in frame
I never wanna let you get away
Without knowing, I loved you all the same
Can you feel the chills running through your arms
Don't tell me there's nothing more to this all
Now I want you to look at me
No really, look at me

When it gets hard
Mabye I know where you are
Even in the darkest dark
I'm there with you
I'm there with you
I'm there with you

So when the light of Polaris slowly fades
You're the beam that peeks around the shades
Even when it hurts to lift my head
My heart swells 'til I float out of the bed
Bright flash, I know you're camera shy
I can't help it that I always have red eyes
But when life gets so bleak and scary
This Polaroid will be necessary

When it gets hard
Mabye I know where you are
Even in the darkest dark
I'm there with you
I'm there with you
I'm there with you

Can you separate yourself into two halves
One watching while the other one reacts
You can play any part you'd like
Tell me who you wanna be tonight
Close your eyes and take a breath
And wait a beat
Open up and let it out and look at me
No really look at me
No really look
When it gets hard

When it gets hard
Mabye I know where you are
Even in the darkest dark
I'm there with you
I'm there with you
I'm there with you

When it gets hard
Mabye I know where you are
Even in the darkest dark
I'm there with you
I'm there with you
I'm there with you
