

## Let It Rise

Punchline

Shake off your past mistakes  
The world can still be yours  
The search is incomplete  
For what you're looking for  
You're so original  
Don't give in to the crowd  
Just let your voice be heard  
And make it plenty loud

They'll try to hold you back  
They'll try to pin you down  
They'll try to drown you out  
But you won't hear a sound  
You will get what you want  
You will get what you need  
You will get where you're going  
Step out and take the lead

Let it rise off of you like smoke

Yeah you can flip that switch  
Yeah you can feel that calm  
Let it rise off of you  
Now you're free that it's gone  
What are you waiting for?  
We're all going to die  
That's why you take the chance  
That's why you start tonight

This is the moment that  
You have been waiting for  
The world is at your feet  
They're banging at your door  
And now the time is here  
The moment has arrived  
The countdown's ending and  
Your dreams will come alive
