

# Very Nervous System

## Punchline

I fought these demons the same old ones  
We got on the weekends and we get it done get it done  
The weekends yeah you're the one  
But you might be the last thing that I ever see

It's a very nervous system that we live in  
Welcome to my world  
It's a very nervous system that we live in  
Still readying spinal chords

Norther shoes  
Soaked in southern blues  
Gets more strange with each scene change  
Like a key change remodulate and sing  
Don't you give up on me  
Don't you give up

Why you sad it's not making sense

It's a very nervous system that we live in  
Welcome to my world  
It's a very nervous system that we live in  
Still readying spinal chords

Don't you give up on me  
Yeah you are welcome out of me  
You watch your charge in spite of me

If you give up on me  
I'm never coming back here  
Never coming back

It's a very nervous system that we live in  
Welcome to my world  
It's a very nervous system that we live in  
Still readying spinal chords

I'm never coming back here  
Never coming back  
Never coming back here again

It's a very nervous system that we live in  
Welcome to my world  
It's a very nervous system that we live in  
Still readying spinal chords
