

# Anaphylaxis

PUP

I never knew I was anaphylactic  
I took the medicine, it wasn't working  
Yeah, I needed something less delicate  
'Cause I can't seem to breathe, and I'm totally nervous again

I gotta confess it was you all along  
Trying my best to keep my head on  
But my heart rate is flying  
I think I'm dying, I'm hoping it's all in my head

This isn't a game  
I'm not feeling well  
My face is aflame  
It was starting to swell  
It was starting to bloat  
And I started freaking out  
Like I was way too stoned  
Was it the allergies, or just me being me, or both?

Came home from the hospital, hazed out on chemicals  
You helped me out of the back of your Audi  
Felt like I'd been kicked in the testicles  
Electrical shocks ripped through my body again

Not again (Not again!)  
I'd do anything (Not again!)  
Shoulda stayed home 'cause I've made a mess of things

I confess (I confess)  
I started panicking (I confess)  
And praying for death  
I'd do anything now

My face started to swell  
My heart started to pound  
And I started freaking out  
Everything's slowing down  
The blood in my ears  
It was the only sound  
Was it the allergies, or something else freaking me out?

Musta been weird  
But what could ya do?  
Watching me bottom out as I came unglued

Like, "Am I gonna die?"  
Am I already dead?  
I keep feeling sick  
And it never seems to end  
This isn't a game  
My face was aflame  
It was starting to swell

It was starting to bloat  
And I started freaking out  
Like I was way too stoned  
"And how does it feel?"

Well, I just don't know  
If it's just me or the weed in my tea  
Or maybe it's something else entirely  
Like some allergies or just me being me or both
