

## Needed To Hear It

PUP

You're already back at it  
I can tell from your face, the reaction was automatic  
Don't even think you realized  
It's just how I feel when my mind's on overdrive  
I was sick and tired of letting you blame me for all your fucki  
ng problems  
Just 'cause you couldn't solve 'em

And I was only telling you that  
I was only telling you that because I know you need to hear it  
And I wish you would just relax  
I was only telling you that because you needed to hear it

We're always keeping score  
You're always empty  
You're always starving for more  
You're feeding on the rotting corpse of goodwill and what's lef  
t of humanity  
What the fuck is wrong with me?

I was only telling you that  
I was only telling you that because I know you need to hear it  
And I wish you would just relax  
I was only telling you that because you needed to hear it

That time that you cut loose  
'Cause you took too many mushrooms  
And waited up all night  
Just to show up at my front door  
Apologizing but you know  
You're allowed to change your mind  
Fuck anyone that ever told you otherwise  
And I might wanna change mine

And I was only telling you that  
Yeah, I was only telling you that because you need to hear it  
And I wish you would just relax  
I was only telling you that because you needed to hear it

I was only telling you that  
I was only telling you that because I know you need to hear it  
And I wish you would just relax  
I was only telling you that because you needed to hear it
