

Smoke Screen

PUP

When it all feels like it's moving too fast
Light the fuse and lean into the blast

You know it's true, I could see you through that smoke screen
And I don't need you to explain
I'm just an old cord, you anymore
I wanna love you but you've changed, yeah

Comin' down while the smoke starts to clear
Your eyes close while your hands try to see her

You know it's true, I could see you through that smoke screen
And I don't need you to explain
I'm just an old cord, dangled on your bedroom floor
I wanna love you but you've changed, yeah

And I know
I'm just an old cord
You can throw away
You try and fix things anymore
I wanna love you but you've changed
