

Breathe
Our tears cast in hope
No mother can't hide her love
From mother such tides of love
In darker zephyr
Steep savage hill
Pensive we climb

Breathe, you made it to here
And hold on , they're putting mother back together
Breather , so brave & so dear
And hold on , they're sewing mother back together

Breathe in new life
Breathe in new life
Pulled into life
Dreams terrify !

You're the beating heart & the blood that binds us
From a foetal start , when the lungs were tired
Now in mother's arms & the harm's behind us
Now you're breathing calm & you cling so fired

I wanna hand you my lungs
Take all the wires out the holes
And make a bed here at home
Steal you from this cage
But now they're speaking in tongues
And fast they line up in robes
Then feed a pipe down your throat
It's time to leave, away !

Deep waves of violence
Been pulling skulls now for days
Amazed in silence
Too much for mother to take

And the surgeon calls us back for more
This time I'm gonna sink something deep inside your spine
Can you help me mum , can you help me dad !
I've had the Lisa technique & I'm connected up & i'm fine
I'm afraid I can't talk , I can barely breathe
But i can feel the cross & I can see my dad on hi knees
Now hold me mother but be careful now & remember I can barely breathe

Breathe , you made it to here
Now please breathe , you made it to here
Please breathe , you made it to here , hold on
Now breathe you made it to here

There's a death swarm
But you're a life force
There's an ecstasy , it beams
And now we leave & death just fantasy

Darker zephyr , so calm beside her
Steep savage hill

Deep ravages
No tears
No more beating
This is the storm you battled

Truth anesthetised
Doom to belt the mind
Soon , her blood isn't right
Boom , it's genesis light
Breathe
