

Never Divide

Pure Reason Revolution

It shades down
But no we'll never divide
And yeah we're dead now
Bled dry defaced avatar hearts

But when you wrote the words
It defined that I could never break us out so I won't
And then you broke the words to defy
Now I can never make it out, down, down

Then I said hang on just a minute
We've all this time but it's no worth
We've all this time not it's no worth
Now hang on just a minute
We've all this time but it's no worth
Yeah we're no worth

You're all I wanted
There is no win
You make me tired of breathing
We're killing the old bliss
There was no win
You made me stop believing
Hold faith and fire, bombs away

I'm face down
Towards the heavens divide
And we'll defend now
Lead eyes, we brace, drawn apart

To death I'll bear the wounds on my heart
No I can never fear them down, alone
Forgive the words of feud and denial
No I will never let you down

It taints our hearts and it breaks our love
You're all I wanted
But what's love is lost to the end
There is no win
You make me tired of breathing
We're killing the old bliss
What's love is lost till we break
There was no win
You made me stop believing
