

Just came to say good night
You were shifting around like
It was too soon but right on time
I was just so shy, so shy
In the dim of the lamplight
You were cast on my insides
If you give me your sleep to dream by
I'll make you alight with mine

Sing me now, la la, bye bye
Read me now, so shy, so shy
Tell me now, good night, good night
Sing me now, la la, bye bye

Just came to say good night
I can see what this looks like
Caught your eyes glimmering in the heat
The rest of me slipping beneath
There's a scent over your skin
To surface a reason
The smell of December rode in
You are the desert breathing

Sing me now, la la, bye bye
Read me now, so shy, so shy
Tell me now, good night, good night
Sing me now, la la, bye bye

Sing me now, la la, bye bye
Read me now, so shy, so shy
Tell me now, good night, good night
Sing me now, la la, bye bye
