

Help Me Living On

Pussycat

When the last emotions you could spend
Were like empty words in letters that you send
When tomorrow is something to hide away
And my nights were filled with dreams of better days

I love you and I still do
But I needed so many years to know
Now that love turned into a new along
Please darling help me living on

Help me, help me living on
Save your love before it's gone
You can tell the world that I've been wrong
But help, me help me living on
Darling, darling, help me living from now on

If there's only sorrow left to share
And the smiling even say you didn't care
When the feelings was usually kept behind
And the kiss became the past tense on your mind

I still love you, honest I do
I can take so many lies from you
But if time refuses to pass along
Then darling help me living on

Help me, help me living on
Save your love before it's gone
You can tell the world that I've been wrong
But help, me help me living on
Darling, darling, darling, help me living
Help me living from now on
