

I Thought

Pyogenesis

I thought I, I'd never let you go away
I thought I, I'd never let you go away
Just never let you, I'd never let you go away
I thought I, I'd never let you go away

You called me once, you called me twice
And I thought this was your disguise
But you wanted to meet me all alone
You wanted to meet me
Things I've made you couldn't take
And that's what it's been
But now it's too late for
Regretting every single day

I thought I, I'd never let you go away
I thought I, I'd never let you go away
Just never let you, I'd never let you go away
I thought I, I'd never let you go away

I know, that I have to go
I will never come back and I want to assure you
That it's not worth to creep along
Not worth anymore now
There's something without any sin
To party with friends
Where you just live in it
It gives you more than girls can do

I thought I, I'd never let you go away
I thought I, I'd never let you go away
Just never let you, I'd never let you go away
I thought I, I'd never let you go away
