

# The Mystery

Pyramaze

When I gaze into the sky at night  
I see a race at the speed of light  
Balls of fire  
Reflections of the past  
A lasting glimpse of a big time blast

Has it been forever?  
How do we fit in?

There's a world beyond our own  
Investigated yet unknown  
History light years away  
Still showing today  
Wistful dreamer  
True believer  
We just can't see  
The great unsolved mystery

Was it evolution or was it heaven sent?  
We need more knowledge to apprehend  
The world around us before we let it go  
And we're closing doors to its final show

Was it meant to crumble in the hands of man?  
Or are we just too dumb to understand?

There's a world beyond our own  
Investigated yet unknown  
Will they teach us who we are?  
Can we get that far?  
Wistful dreamer  
True believer  
We just can't see  
The great unsolved mystery

We've got everything to lose  
And nothing left to gain  
Are we becoming champions of pain?  
There's still embers in the dark  
And sparkles in our eyes  
If we really had to choose  
We'd ditch our reservations and rise

There's a world beyond our own  
Investigated yet unknown  
History light years away  
Still showing today  
Wistful dreamer  
True believer  
We just can't see  
The great unsolved mystery
