

Mind's Eye

Quadeca

In my mind's eye
I've been living in my mind's eye
To most I ain't safe in my right mind
Say the wrong words at the right time see blue through the sky in the night
time when I'm in my mind's eye
I've been living in my mind's eye
And I know that I need to find my way
I need to find my way
Reality's actually something that I see as tragedy passin' me sometimes whil
e I need some gravity
I need som' extra
Feel like I'm floating
I feel I ain't special
Feel like there's sometimes when I'm out here dreamin'
My mind just believes what I'm seein'
The air that I'm breathing is feelin' so good to me
And I swear it is
And it's killin' me
I mean, there it is gone
Yeah that shit's way too unfair
It's like a comparison
Shit is imperative, damagin'
Please call me an ambulance
I am collapsin' right under my arrogance
Panickin', standin' still like I'm a mannequin
My freedom goes way beyond an American's
I ain't funny, I'm just crazy
Ain't unlucky, I'm just lazy
I'm running on stages too enthusiastically
Look at how all of these people seem proud of me
Then look at everyone doubtin' me
Feel they surroundin' me
Well, they are bound to see something that's out of this planet
I know that you can't understand it
But damnit, I know that I'm living to show that I'm winnin'
And growin', it's only expanding

In my mind's eye
I've been living in my mind's eye
To most I ain't safe in my right mind
Say the wrong words at the right time see blue through the sky in the night
time when I'm in my mind's eye
I've been living in my mind's eye
And I know that I need to find my way
I need to find my way

Ride me for a little
When I go to look at the big picture see irony in the middle
I see followin' and I see I see a train that will beat a grizzle
But it never will
None of these people can ever chill
Shaken the game up but really its never still
I am just searching for better deals
Tryin' to come up with back with some flow and some better skills
Never will I ever get what I came to see patiently waiting these people are
hating me
Basically I will keep going till I am dead

Listening and only [?] simon says
I can not satisfy critiques without antagonizing a couple of fans
Without surprising a couple of bitches who swear that they love me but really they can't
Done
Writing these verses I'm plains verses on trains so people still claiming I'm the worst in the game
And it hurts to explain and I'm currently changing it up
And I'm working the same, I'm working same, damn I'm perfectly sane
I'm spitting my fire I'm burning the game
Not really but I got a flow cause at this point in time this shit is all I know
Really I devoted tons of shit to go on a low, honor roll
But no I'm not honor roll
Man I got to go its time to learn some shit I though I know I thought I know

In my mind's eye
I've been living in my mind's eye
To most I ain't safe in my right mind
Say the wrong words at the right time see blue through the sky in the night time when I'm in my mind's eye
I've been living in my mind's eye
And I know that I need to find mine way
I need to find mine way
