

THE NSA RAP

Quadeca

Alright, what is up, guys?
Welcome to a rap song about the NSA
Um, it's pretty opinionated, so
Um, if you don't agree, that's fine, this is just my opinion, s
o
Don't get too angry, 'cause, I don't know
People get angry about this type of stuff
So, yeah, anyways
Just enjoy the rap

The NSA's an organization who collect every
Type of data possible and then stores it in their memory
Privacy's at jeopardy, requires little energy
To find everything I've done and use that to discredit me
Every phone call, every word in a message
Collected, but people try to act like we're not affected
Get this together, you're probably misdirected
So just listen to this evidence about to be presented:
The main goal is to have terrorists prevented
From attacking the States like the tragedies on 9/11
They've been around for long, now they're on year seven
And they haven't had any terrorist preventions
The NSA can access anything on the internet
There's even been a case where they spied on their love interes
t
They listening on conferences from some corporations
They do this to gain advantages in negotiations
Does this protect the nation? No!
Did you know that the NSA's spying revelations
Could cost the U.S. industries' millions?
According to most, it would cost them billions
In 2008, three-million Yahoo! users
Were targeted through the webcams on their computers
Even if they were not suspected of doing wrong
They were still spied on for six months- that's pretty long
The reason I sing this song
Is to raise awareness for some of the issues going on
This is just a little bit of a lot of information
Take a step to give yourself some education

Thank you guys for listening
There's a few links in the description if you want to read more
about this
Um, and anyways, thank you guys for watching, and...
Bye!
