

# Better Off

Quadron

Better of without you  
Better off my baby  
Better off without  
Better off my baby

And I'm better off without you  
Better off my baby  
Better off my baby  
Better off without you

I waited for you mainly  
Can't believe you made me  
Oh lord of daydreams  
Leading on the maybes  
And why you would treasure me  
Search for you and rule me  
Close sits on nothing  
Why we should be killing

Sorrow Sorrow (searching searching 'em)  
Crossed Hearts (you crossed your heart and now you lose)  
I'm better without you  
Yeah  
I'm better without you  
Yeah

Avery Is only half full in your thoughts  
You get no better now  
Patiently, cause you're so heavy in my heart  
I could do better now

I'm with you  
I'm with you (If you really want me to be with you than I can chose)  
And you want me  
I can choose my own (I could do better)  
I know I can do better

Love is life and life is love, I like to love  
Every part of you. The party life can never do enough  
So many obstacles the possibilities are breaking up  
Can move in hospital with that extra patient you got me stuck  
I'll play the prostitute if you've got the patience to pimp me  
But you never put me on the strip, put it on then you strip  
Put it on your fingertips and I'll kiss it off  
You better not kiss me goodbye, Test my faith and kiss the cross  
I'm trying to go there, take you slow there if it's alright  
Tell me that you care baby we could share a full life  
Truth and double dare that I do repair broken hearts  
Cupid shot me in the dark, stupid I didn't play my part  
Ask for your forgiveness, if it's worth it I can serve a purpose  
If I'm st... st... stuttering because I'm nervous  
Tell me that you love me still  
Promise that I'm staying still  
Honesty is all I need  
Honestly, we can build

The stakes are full now

Still wait for you  
I'm better off with you (I'm better off)  
Yeah  
I'm better off with you  
Yeah

I'm with you (If you really want me to)  
I can't chose life (I can't chose)  
I could do better, better now
