

One Less Lie

Quarterflash

You had me for the taking
Then the tables got turned
You ran for cover to the next best lover
When your finger's got burned
I'm going make it easy
Just get out your life
When I said goodbye
There'll be one less lie you have to sell tonight
I don't want to drag you down
I don't want on your knees
Thought you could get me good
Consider me
Consider me
One less lie
For you to think about
One less lie
For you to figure out
One less lie
Don't give a second thought
Just get me all your got
One less one less lie

I shouldn't known better
With somebody like you
You showed your real heart when it fell apart
And you couldn't come though
I want to make easy
Get out of your life
When I said goodbye
There'll be one less lie you have to sell tonight
I don't want to drag you down
I don't want on your knees
Thought you could get me good
Consider me
Consider me
One less lie
For you to think about
One less lie
For you to figure out
One less lie
Don't give a second thought
Just get me all your got
One less one less lie

You say you want to work things out
Said you want to change my mind
I don't want leave any doubt
I don't want to waste my time
You lie to strangers
You lie to friends
You lie for money
No the lying never ends
Don't you worry that your days of getting caught
Take it easy
One less lie
For you to think about
One less lie

For you to figure out
One less lie
For you to kick around
For you to kick around
For you to kick around
One less lie
One less lie
Got ahead and tell
One less lie
One One
One less lie
One less lie
