

# Another Me

Queen Naija

How you holdin' up?  
Hope you doin' well  
Say you happy with yo' new girl, yeah, I can tell  
See you smiling on the 'Gram, oh, that's how you feel  
Did you forget I know you hide your feelings very well?

And I know you like the back of my hand  
'Cause you know we got history  
We were meant to be  
Ain't that what you said to me?

You'll never find another me  
You been searching all over the world  
But you won't find another me  
You done said that you loved 'bout three-four girls  
But it's only one of me  
You been searching all over the world  
But you won't find another me  
But you can keep on pretending

You know you could never erase me  
So you tried to copy and paste me  
Taking her all the places you would take me  
To make her feel better you downplay me  
And degrade me  
But you and I both know  
I still got your heart and soul  
And if it really came down to it  
If I told you to leave her you would do it  
You would do it and I know

I know you like the back of my hand  
You know we got history  
We were meant to be  
Ain't that what you said to me?

You'll never find another me  
You been searching all over the world  
But you won't find another me  
You done said that you loved 'bout three-four girls  
But it's only one of me  
You been searching all over the world  
But you won't find another me  
But you can keep on pretending

And I know that it hurts you  
It cuts you like a knife  
When she's laying right there by your side  
And my voice in your head keeps reminding you

You'll never find another me  
You'll never find another  
You been searching all over the world  
But you won't find another me  
You done said that you loved 'bout three-four girls  
But it's only one of me  
You been searching all over the world

But you won't find another me  
But you can keep on pretending
