

Life Without You

Queensrÿche

You couldn't take them both out of the lock pick
You closed the door
Like a rocking chair above this ice
And they played our songs, don't play our song
Again, I'm breaking

There's no life without you
Your promises are breaking
There's no life without you
Life without you, life without you
What's there left to say?
Words came in the way
There's no life without you
Life without you, life without you

Revolution was in the air
It was everywhere
On the streets, on your bed
It's hard to believe
Believe it's over
Hard to believe
I thought this is all I want
But I was so young
I was so much more

There's no life without you
Your promises are breaking
There's no life without you
Life without you, life without you
Showers in the rain
I just came my way
There's no life without you
Life without you, life without you

This is how we take
This is how we take
Life without you, life without you

The pain I felt, it came and it plays all around
In my mind there will not be a life without you

Life without you
Life without you
There's no life without you
Life without you, life without you
What's there left to say?
What's there left to say?
Life without you, life without you
What's there left?
