MATH

QUIÑ

You did the right thing
When you went and looked my way

I know what you wanna say
You wrote it all on your face

Just beam me up, beam me up, leave me, don't bring me down
You've been fighting from the gallows, the shadows just come on out

But you know, it's all good when it's all bad
Been hurting all day but it's all math
You're losing your brain and falling right back

It's all good when it's all bad
Been looking all day but it's all math
Just solve the equation get it all back

You said the right thing
When you thought to call my name

Just beam me up beam me up leave me don't bring me down

You've been fighting from the gallows
The shadows just come on out

It's all good when it's all bad
Been hurting all day but it's all math
You're losing your brain and falling right back

Baby yeah, it's all good when it's all bad
Been searching all day but it's all math
Just solve the equation get it all back

Just run away my love
Been thinking about it long enough
Don't really know the right way to go
But I'm all about it

Just run away my love
Been thinking about it long enough
Don't really know the right way to go
But I'm all about it

Just beam me up beam me up leave me don't bring me down

You've been fighting from the gallows
The shadows just come on out

It's all good when it's all bad
Been hurting all day but its all math
Just solve the equation get it all back, all Back
