

Are we going to where the morning never breaks
Do we need to be afraid or hesitate
Cause wherever I go, wherever this here man will go
There's no way but down, no way but down

Wish I could see but all the lights are blinding me
wish I could see what has been and what will be
wish you could be my saviour
won't you carry me across the line

Can you heal me cause my broken body aches
I trade yeah anything to make up for my mistakes
Well give me something to ease the pain inside my soul
Come on and black my sky, black my sky

Wish I could see but all the lights are blinding me
Wish I could see but all the lights are blinding me
wish you could be my saviour
won't you carry me across the line

Way up high in the silvery skies the ending of time I see
Too late now, no solution at hand, no miracle man for me
no miracle man for me

Wish I could see
What has been and what will be
