

Music is Better

Rüfüs Du Sol

As I lie in the sun
On the edge of a dream
You play me a song

Before I knew what you'd done
I was up on my feet
Dancing along

Music is better
When we're together
Listening to music (Listening to music, listening to music)
Music is better
When we're together
Listening to music (Listening to music, listening to music)

You were laughing along
As you danced in the breeze
Lost in the song

And while the music was on
I was there at your feet
Dancing along

Music is better
When we're together
Listening to music (Listening to music, listening to music)
Music is better
When we're together
Listening to music (Listening to music, listening to music)

Music is better
When we're together
Listening to music (Listening to music, listening to music)
Music is better
When we're together
Listening to music, music, music, music

Music is better
When we're together
Listening to music (Listening to music, listening to music)
Music is better
When we're together
Listening to music (Listening to music, listening to music)
