

I know a place where I want to go
Could you just stay by my side
It'll be a ride
I want a taste of the other side
Could you just give me some time
To make it right

I want to go, I want to fly
I want to take myself to a new sky
I want to live, I want to die
I want to thank myself for getting out
Take me to another place
Take me to another place

I know a place that I want to find
Could you just open your eyes
And free your mind
I want to face what I haven't tried
Babe it just took me some time
To realize

I want to go, I want to fly
I want to take myself to a new sky
I want to live, I want to die
I want to thank myself for getting out
Take me to another place
Take me to another place
Take me to another place
Take me to another place
Take me to another place

I know a place where I want to go
