

Take Me

Rüfüs Du Sol

Take me away across the ocean
Out in the horizon the night is falling

Outside in the golden air
Washed out and no one's there
She said I'll need you there sometime
Sunset in the breeze
Drifting into me
Our love will make it right this time

So take me away across the ocean
Out in the horizon the night is falling
Take me away across the ocean
Out in the horizon the night is falling
Take me away across the ocean
Out in the horizon the night is falling

Skyline closing in
Her eyes whispering
Please swim across the night to find
Underwater lights
Shadows in disguise
Your lips come close to mine in time

Sunset in the breeze
Drifting into me
Our love will make it right this time

So take me away across the ocean
Out in the horizon the night is falling
Take me away across the ocean
Out in the horizon the night is falling
