

Bitter Conversation

Ra Ra Riot

If we get into this conversation again
You know there's one thing we can do
Been at it all night, we both know we're right
You can't tell me you ain't tired

Are we gonna let this night pass by in vain?
It's such a shame

How do we find ourselves with all these complications?
Gotta be a way to end this bitter conversation
If we could only stop, come together, and make love, love, love

Feels like I'm walking through a minefield
I give up, but I won't quit
Addicted to blame, stoking the flame
It's never enough, but hey, I guess we're the same

Got ourselves into some real good trouble now
There's one way out

How do we find ourselves with all these complications?
Gotta be a way to end this bitter conversation
If we could only stop, come together, and make love, love, love

Now that it's clear
I know you're sincere when you talk to me
So let's remember it this way
And nothing will tear us apart

How do we find ourselves with all these complications?
Gotta be a way to end this bitter conversation
If we could only stop, come together, and make love, love, love
Love, love, love
