

Release me  
Come alive, come alive  
Through the doorway  
It's hard to breathe  
Come alive, come alive  
In a daze

There's something lethal in you (There's something lethal in you, yeah)  
There's something lethal in you (There's something lethal, yeah)  
Tracing shadows on my mind  
We're coming to love, coming to love  
Tracing the shallow of my mind, my mind  
We're coming to love, coming to love

Ether  
Think you're the one  
Ether  
You make me numb (We're coming to love, coming to love)  
Ether (It's true)  
Think you're the one (We're coming to love, coming to love)  
Ether (You know you do)  
You make me numb (We're coming to love, we're coming to love)

In the meantime  
Look alive, look alive  
In a white line  
A little higher  
Look alive, look alive  
Let it ride

There's something lethal in you (There's something lethal in you, yeah)  
There's something lethal in you (There's something lethal, yeah)  
Tracing shadows on my mind  
We're coming to love, coming to love  
Tracing the shallow of my mind, my mind  
We're coming to love, coming to love

Ether  
Think you're the one  
Ether  
You make me numb (We're coming to love, coming to love)  
Ether (It's true)  
Think you're the one (We're coming to love, coming to love)  
Ether (You know you do)  
You make me numb (We're coming to love, we're coming to love)

We're coming to love, we're coming to love  
We're coming to love, we're coming to love
