

## Ready For It

RAC

I fell asleep with the enemy  
Can it go back to how it used to be?  
Your shadow hung in my memory  
A hand to hold, a picture to believe  
And I fall into the night again

It took so long to be on my own  
When the morning comes I hope I'm ready for it  
And the night won't wake till we get back home  
When the morning comes I hope we're ready for it

You come to me as the snow begins  
The thunder rolls, the rain, it's still, it seems  
But I fell into the night again

It took so long to be on my own  
When the morning comes I hope I'm ready for it  
And the night won't wait till we get back home  
When the morning comes I hope we're ready for it

Hope we're ready for it  
I hope we're ready for it  
Hope we're ready for it
