

Good Side

Rachel Grae

I got this second identity
That double tap energy
Been living and breathing on my phone
You think we're identical
But she's two-dimensional
And I got my issues yeah I know

She always looks great
Can't make a mistake
Wish I were as happy as the smile on her face
The way that she live
So filtered and fixed
Not really what you see on your feed, I'm not perfect

You only see my good side
Only play the highlights
The parts of me I don't hide
See me in the good light
But this isn't real life
You're seeing me in disguise
Only see my good side, good side, good side
Only see my good side, good side, good side

I've got this second identity
My friend and my enemy
Yeah she won't leave me alone
'Cause she's popping up again
With fake friends and messages
But they don't know what I know

Say I look great
But playing the game
Is getting exhausting at the end of the day

You only see my good side
Only play the highlights
The parts of me I don't hide
See me in the good light
But this isn't real life
You're seeing me in disguise
Only see my good side, good side, good side
Only see my good side, good side, good side

Talk about my problems in some other song
But for now I'm gonna act like I do nothing wrong
And have a good time
And only show my good side
I got this second identity
That double tap energy
And I got my issues yeah I know

Good side
Only play the highlights (good side)
The parts of me I don't hide
See me in the good light
But this isn't real life
You're seeing me in disguise

Only see my good side, good side, good side
Only see my good side, good side, good side
Only see my good side, good side, good side
Good side, good side, good side
