

Foreign Bodies

Radiation City

Don't look now
Summer soul will bring you down
Only one act
Begs for another bow
When the morning is ripe
With a changing mind
And the water, water, water
Is so fine
We will go

Go outside
The sky is falling down
I can see you flying a kite
Girl that's why
There's time for us now

Tanya, Tanya, Tanya
You make it so easy

So don't look now you
Won't always be around
Hazy heart beats
Take us to higher ground
And the water, water, water
Is so high
You're the only one
The first and the last of your kind
To say we'll go

You're the only one
Go outside
The sky is falling down
You're the only one
I can see you
Flying a kite
Ooh you're the only one
Girl that's wise
There's time there will be time
