

See It Through

Radical Face

Lost in the dark, nowhere to go
Wishing you were somebody else
Someone who's never needed a thing
Someone who's never afraid

I tried to call, you didn't pick up
I pretended to believe when you said
That you're doing fine now
There's no need to check
That you'll take care of the rest

I know you well enough to know you've had a rough go
I can hear it in your voice when you say "I don't know"
So I'm leaving you this message for the next time it rains

So come what may
We'll see it through
We'll see it through, I swear
What bends doesn't break
We'll see it through
We'll it through
I promise you
Take my hand
We'll see this through
We'll see this through
I've got you
So come what will
We'll see it through
We'll see it through
I promise

Now I'm the one lost in the dark
Wishing I was somebody else
Someone who never feels a thing
Someone who never gives in
You sat beside me, hand in my hand
And you told me that you knew what I meant
But everyone loses themselves sometimes
And I will find it again

You know me well enough to know I've had a rough go
You sit and listen while I put on my whole tough show
Then you tell me it's okay to need some help now and then

So come what may
We'll see it through
We'll see it through, I swear
What bends doesn't break
We'll see it through
We'll it through
I promise you
Take my hand
We'll see this through
We'll see this through
I've got you
So come what will
We'll see it through

We'll see it through
I promise
