

Against The Machine

Rage

I cannot believe my eyes
The narrations of these days
See the neighborhood go down
Rotting structures all around

They're cutting down our wires
We cannot pay our homes
Don't follow all those liars
Or hide under a stone

Against the lies and the decline
Let's find a way, let's find a line
Let's work against the machine now
It's a religion that denies
All what we learned from the old days
Let's work against the machine now

Hear the warnings from the ones
That know 'bout the things
Blind from ideology
Fat bird spreads no wings

The master of prevention
All innovation dies
You're causing all those problems
By keeping them alive

Against the lies and the decline
Let's find a way, let's find a line
Let's work against the machine now
It's a religion that denies
All what we learned from the old days
Let's work against the machine now

Against the lies and the decline
Let's find a way, let's find a line
Let's work against the machine now
It's a religion that denies
All what we learned from the old days
Let's work against the machine now
