

# Blackened Karma

Rage

In the depths of our mind  
Sleeps all that we've left behind  
All we've forgotten  
And all that we've ever made  
Left a footprint in the universe  
A certain energy

We gather what we send out  
And we keep it all

This is what we are - darkness lies within  
This is what we get - that's blackened karma  
Give a little destiny, take away the pain  
This is what we've got - that's blackened karma

We are stuck to our fate  
And however we might try to run away, to turn around  
We will have to pay the price  
All we took away and all the bills we've left unpaid in life

We gather what we send out  
And we keep it all

This is what we are - darkness lies within  
This is what we get - that's blackened karma  
Give a little destiny, take away the pain  
This is what we've got - that's blackened karma

This is what we are - darkness lies within  
This is what we get - that's blackened karma  
Give a little destiny, take away the pain  
This is what we've got - that's blackened karma  
This is what we are - darkness lies within  
This is what we get - that's blackened karma  
Give a little destiny, take away the pain  
This is what we've got - that's blackened karma, yeah!
