

Flying high, setting signs  
we got the future in our veins  
but still a long way to go

All we know has lost its size  
if you're looking down from space.  
Your problems are unreal at one blow

Does it make a sense at last  
to learn the mistakes of the past?  
Infected with an old disease

And today tomorrow waits  
in another galaxy.  
Waiting to take us away

We are the only truth?  
How can we be so smug  
like a child playing God...  
I wish I knew  
is it still far to go - Invisible horizons  
What is behind  
the picture in my mind - Invisible horizons

It is many ages away  
a life that's far beyond our rays  
that we send out to get a sign

A million places there to be  
it's only logical, you see  
that we're not the centre of creation

We are the only truth?  
How can we be so smug  
like a child playing God...  
I wish I knew  
is it still far to go - Invisible horizons  
What is behind  
the picture in my mind - Invisible horizons
