

# Spreading the Plague

Rage

When I came from far away  
Virginity was mine  
And my people lived in union  
With all life that we had found  
So creation fed its children  
All was perfect, all was good  
Until we unchained the beast  
Inside ourselves not understood  
That we unlocked doors that we could  
Never close again  
The end of paradise

Now we're falling, endless falling  
We are spreading the plague  
Now we're falling, endless falling  
We are spreading the plague

Once that we had played the rules  
We never took more than we need  
But now more and more decide  
They want it all, to live their greed  
So now we all drown in hate  
And war is marching through the land  
All our brothers, they must die  
The virus spreads from hand to hand  
We have turned against ourselves  
We cannot lock that door  
The end of paradise

Now we're falling, endless falling  
We are spreading the plague  
Now we're falling, endless falling  
We are spreading the plague

The end of paradise  
Now we're falling, endless falling  
We are spreading the plague  
Now we're falling, endless falling  
We are spreading the plague

Now we're falling, yeah  
We are spreading the plague  
We ourselves are the plague
