The Edge of Darkness

Rage

Tell the world we'll lose our future any time
This will be a rude awakening if we don't stop now
Everywhere we see the atomic threat will be
Handled by the bad, the deceivers that gone mad
Lead us into death

To hell and back, we're
On the edge of darkness
Never return
On the edge of darkness

When the nuclear dictators ride the bomb
Hell is here to stay forever, do you want it so

Instability killing the economy
Continents in war throwing horror on the poor
Mother nature dies

To hell and back, we're
On the edge of darkness
Never return
On the edge of darkness
When will we learn

Pull your head out of the sand, you need to know
Your ass, it will burn red hot, right when it all explodes

Everywhere it seems all those people lost their dreams
Everyone's insane, all the warning was in vain
Blinded 'till we're dead

To hell and back, we're
When will we learn, will we ever learn
