

The Icecold Hand of Destiny

Rage

Plans I have made to build it up from this state
Always moving, never stop, though the answers are made
'Bout the future, 'bout the past
Where I come from, what will last

Try to delay things that lead you astray
But society sucks you out, leads to early decay

If I will , if I won't, a decision that I could not flee
I prayed it leave me be - the icecold hand of destiny

Everything's right, it seems the future looks bright
But there's always factor X that leads the tumbling dice

If I will , if I won't, a decision that I could not flee
I prayed it leave me be - the icecold hand of destiny

If I will , if I won't, a decision that I could not flee
I prayed it leave me be - the icecold hand of destiny

Play for future, play for past
Where you come from, what will last

Everything's right, it seems the future looks bright
But there's always factor X that leads the tumbling dice

If I will , if I won't, a decision that I could not flee
I prayed it leave me be - the icecold hand of destiny

If I will , if I won't, a decision that I could not flee
I prayed it leave me be - the icecold hand of destiny
I prayed it leave me be - the icecold hand of destiny
