You don't like what you see You don't know what it means and what it's like You close your eyes You're afraid that all you have learned has changed

Time waits for noone
You can't fix it if you try
Time waits for noone

You can join it for a little while

Once put into your brain
All the things of life got a special frame
But you forget that this world's got a different face each day

Time waits for noone
You can't fix it if you try
Time waits for noone

You can join it for a little while You can join it till you die

What's this jungle noise Long haired filthy boys Sex before marriage You don't believe in the pope

Time waits for noone Time waits for noone Time waits for noone Time waits for noone
