

## Fireflies

Rag'n'Bone Man

There's a world you don't see  
Old man's tears for a young man's dreams  
In my eyes, you're growing like the weeds  
I can't decide if I'm you or if you're me

Don't let fear be a thorn in your side  
Keep your eyes on the light  
And let everyone know that you caught it  
Like fireflies in the garden  
Past the trees and the stones that were thrown  
Walk the longest way home  
And let everyone know they're invited  
To see fireflies in the garden

One day it starts, we'll disappear  
You might go away but you can always come back here  
The seasons will change from golden to silver  
Don't let time turn your heart into winter

Don't let fear be a thorn in your side  
Keep your eyes on the light  
And let everyone know that you caught it  
Like fireflies in the garden  
Past the trees and the stones that were thrown  
Walk the longest way home  
And let everyone know that you caught it  
Like fireflies in the garden

Go where the sunlight meets the morning  
Oh, dig till you find what you're looking for

Don't let fear be a thorn in your side  
Keep your eyes on the light  
And let everyone know that you caught it  
Like fireflies in the garden  
Past the trees and the stones that were thrown  
Walk the longest way home  
And let everyone know they're invited  
To see fireflies in the garden

There's a world you don't see  
Old man's tears for a young man's dreams
