

Outer Limits

Raheem DeVaughn

It's no concept of time when we're here
This loving on my mind when you're near
These bodies intertwined when we're here
Like I'm buzzing of some wine when you're here
Just the moaning of your voice in my ear
Keep you dripping wet and moist when you're here
Shit I never need another choice now that you're here
When we lay, our bodies rejoice when we're here
And your eyes look me in my soul when we're here
At the edge of the bed, you be on your tippy toes when you're here
And when we come, we black out, everything stops
See there's some damn good loving you got girl up in here
The way we're steaming up the mirrors up in here
With your laces spending eerie even here
Feels like we're making love forever when we're here

I float on clouds
I dive in the sea (I dive in the sea)
When I touch every part of you (You) with me (You baby)
To an outer limit (knock off)
To another galaxy (Galaxy, yeah)
When I touch every part of you (You touch, you) with every part of me

Fingers touching on your skin when you're here (When you're here)
Lips kissing 'til no end when you're here
Long to love you long when you're here
We power down the phones when we're here
We look it out, shadows on the walls when you're here
I been standing like ten feet tall when you're here
I don't quit it once I get it when we're here
I'm your circle in your wave up in here
With your mind, do you read my freaky thoughts up in here
We're one love, we're one heart when we're up in here
Playing "Forever my Lady" up in here
Tryna go up, want a baby up in here
The way we see the morning sun after the moon
And when you wake up it's beautiful like a flower's bloom
See every daydream is a reminder of you

I float on clouds (When you float on clouds)
I dive in the sea (When I dive in, I see through)
When I touch every part of you with me
(When I touch when I touch when I touch, ooh, when I touch)
To an outer limit (I, I'm going to another galaxy yeah)
To another galaxy (When I touch, when I touch)
When I touch every part of you (touch you) with me (Every part of me)

I float on clouds (I float on clouds)
I dive in the sea (When, when I'm in love)
When I touch every part of you with me
(When I touch, every, part of you, with me, ooh ooh)
To an outer limit (I told you, outer baby)
To another galaxy (To another galaxy)
When I touch every part of you (When I touch you) with every part of me

I float on clouds
I dive in the sea (I dive)

When I touch every part of you with me
(When I touch, when I'm touching every part, yeah, when I'm touching every part you need)
To an outer limit (I go baby, you go baby)
To another galaxy (We go lady)
When I touch every part of you with me
(When I touch you, all of you, with all of me, baby)

I float on clouds (Baby you are the power)
I dive in the sea (I dive in the sea)
When I touch every part of you with me
(When I touch you with all of me)
To an outer limit (Oh)

There's with my outer body experience
Eyes to the corridor, open the door
Follow you into fearless
Come get quiet with me
Hear the nation calling from between my thighs
Feel the comfort of my side on your back
Come milk into this flesh
The black and brown, the grease, the soft
"I need you soon" I hear
Maybe you tell me
"You don't have to wait, I'll be there love, see you at eight"
