My heart pounds
All of this makes me happy

I don't know since when
But feels like I have everything
I can't fall asleep because of the butterflies
Everything feels like a dream

You are a light in my life
That was once tired and exhausted
You're my paradise
You erase all of the bad memories of the past

You're my love
After a long wait
There's only one sunshine
Shining under the sun
This start is for you

Was it you?
That made me like this?

From a to z I like everything about you

I'm so happy, I could fly Everything feels like a dream

You are a light in my life
That was once tired and exhausted
You're my paradise
You erase all of the bad memories of the past

You're my love
After a long wait
There's only one sunshine
Shining under the sun
This start is for you

Let's get on up, alright Smile for me Show me yourself

Let's get on up, alright Let's start now

This feeling today
I wanna share it with you forever

You're my love
After a long wait
There's only one sunshine
Shining under the sun
This start is for you
