

## Fighting

Rains

Standing on the back porch shaking your head  
He's holding your hand  
Asking each other can we get through this  
It's been a long road still a long road ahead  
If we don't give up  
And work together we can get through this

Well I've asked you to trust me with me  
And you've asked me to trust you with you  
And hope for the best

You're something worth fighting for  
And we've been at this so long  
I know you want so much more  
But I need you to stay strong  
I won't let you shut this door  
It's what we wanted all along  
we're something worth fighting for  
And I need you to stay strong, strong, strong

Well I've got the music you've got the soul  
To pull us through  
And turn our lives into so much more  
Remember that first time that first glance  
I took your hand  
And begged for you to give me one chance

I was on my knees to let me have you  
And don't look back there's no regrets  
Just let me love you

You're something worth fighting for  
And we've been at this so long  
I know you want so much more  
But I need you to stay strong  
I won't let you shut this door  
It's what we wanted all along  
we're something worth fighting for  
And I need you to stay strong, strong, strong

Well I've got the music you've got the soul  
To pull us through  
And turn our lives into so much more
