

Always these imaginary attacks on their defences  
No matter the expenses they wanna build up borders and fences  
It makes no sense, no one thinks about the consequences  
Offenses like children in cages, oh, it's just f\*cking senseless

What's wrong with the world today?  
What is it that makes us behave this way?  
What is it, tell me what is it?

Young kids, computer villains with drones are killing civilians  
While planes with conventional bombs are still killing millions  
What a surprise, we're getting polarized by trolls on every device  
We sacrifice fellowship in what was once our paradise

What's wrong with the world today?

What is it that makes us behave this way?  
What is it, tell me what is it?

When they return home to their families  
The love is the same, there is no flame  
Chasing happiness, they drink champagne  
And let the TV entertain, no further claim  
This family in the picture frame gets murdered  
And it's not a computer game  
It's not a computer game  
It's not a computer game  
It's not a computer game  
It's not...

What's wrong with the world today?  
What is it that makes us behave this way?  
What is it, tell me what is it?

Violence, hatred, animosity  
Violence, hatred, animosity
