

Left Right

Rak-Su

Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright
Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright

Ah, won't you let me pull up on your side, baby
I know that you wanna take a ride
Mi muh like to play with the rules, oh yeah
I just wanna flow with the vibe
The music controllin' me
Oh baby, just feel the beat, yeah, yeah
Young African boy, you see
Nobody do it better than me
Ay yelele

In control of me
And I never let anyone close to me
Bae, you can take over me
Let the melody move your feet like

Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright
Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright

I never let anybody close with you it's different
Every time that I'm home alone, it's you I'm missin'
I know you say that it is easy to love you
But, girl, my heart has been broken
So, yeah, it's harder to trust you
Just know I'm trying hard
You make me smile and laugh
You say, "Take my hand and have faith in us"
If you take the lead, girl, I will take the leap
The way you make me feel, I pray you never leave, ay

In control of me
And I never let anyone close to me
Bae, you can take over me
Let the melody move your feet like

Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright
Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright

Step with me, step with me, baby, one, two
Step with me, step with me, baby, one, two
Step with me, step with me, baby, one, two
Step with me, step with me, baby, one, two

Let's slide till the morning
Come by when you want it
The way that you move it, bae
Make it hard to concentrate

Yeah, ay, girl, you know me
Hands on you body, I'll make you wanna wine slowly
Say you a freak, well, now you haffa come show me
Plenty positions, I'll have you lookin' like a yogi
Light up your body, I'm finna leave the room smoky
Step in the room and every eye is on you
You got the somethin', I'm tryna see what somethin' do
We goin' in, they think we got a curfew
Slide left, right, baby, can you throw it back too?

Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright
Left, right, throw it to the side
Any way you want, any way you like
Left, right, throw it to the side
It's all good, baby, it's alright

Throw it to the side
Any way you like
Throw it to the side
Any way you like
