

Eyes of the Night

RAM

Roaming the starways
Swift astral flight
In from beyond and back
Seeking the conjurer
Seeking the one that calls for us tonight

We owe him allegiance
We are the eyes of the night
Once we were human
Now finally we have left the light
Lead us on

Controlling your nightmares
Ride on your back
Dancing around your corpse
Honour the master
The shadowman
Darkness incarnate

We owe him allegiance
We are the eyes of the night
Once we were human
Now finally we have left the light

Take heed all you humans
Don't close your eyes
We will be there tonight
Tormenting the dreamer
Stealing his soul
Offering to our lord

We owe him allegiance
We are the eyes of the night
Once we were human
Now finally we have left the light
Lead us on
