

Fly Away

RAN

We could fly away, ay ay ay ay
Somewhere far, some place where no one else can go
Someplace where only you might know how to get there
Someplace where only doves have seen the skies
Someplace where only you might know how to get there

And we can touch the sky
Together we can find a way
We can make it there
And no one will stand in our way
We can even go where nobody knows
Where only you and I...

We could fly away, ay ay ay ay
A place in the sun some place that's for the [?] star
A place where only you might know how to get there
It's not as far as Jupiter but further than Mars
A place where only you might know how to get there

And we can touch the sky
Together we can find a way
We can make it there
And no one will stand in our way
We can even go where nobody knows
Where only you and I...

We could fly away, ay ay ay ay
