

What Do You Want from Life

Randy Stonehill

What do you want from life
Baby, what you want from life
What do you want from life
Tell me what you want from life

I want to keep the heart of a child
I don't want to let my fears control me
and in this world that's running wild
I want to remember how it should be
and when push comes to a shove
I wanna try and use a little love

What do you want from life
Tell me what you want from life

I want to learn from my mistakes
I ain't got time to go the long way
And if things start going wrong
I need to find the faith to carry on

Don't go marching in the fool's parade
don't let the old man sell you no shades
I don't let 'em stand in my way
Cause I'm free

I want to do the thing that's right
I need to know that satisfaction
And I want to live without a doubt
Without a doubt that I never sold out
