Turn It Around

Randy Travis

I can't believe I'm standin' out here in the yard Starin' at those tread marks you left with your car Before you get too far out of town I hope you turn it around

I didn't think you had it in you Who'd have thought you'd really leave It's kind of like some movie I wish I'd never seen You left and left my world upside down You've got to turn it around

It's safe to say I've underestimated how strong you are Apparently girl you've got what it takes to break my heart You're everything I need I know, right now I wanna hold you clo se And all I can do is pray that you'll come home

It's probably a safe bet that you ain't comin' back I made some big mistakes, I'll admit to that If there's still a chance that we can work this out My life's gotta change startin' now I'm goin' to turn it around

It's safe to say I've underestimated how strong you are Apparently girl, you've got what it takes to break my heart You're everything I need I know, right now I wanna hold you clo se And all I can do is pray that you'll come home

I can't believe I'm standin' out here in the yard Starin' at those tread marks you left with your car Before you get too far out of town My life's gonna change startin' now I need to turn it around, baby turn it around
