

Ostrich Behaviour

Randy

Somehow i feel my life is coming to a dead end and there is now here i can go. The easy life that we used to play, yeah! has slipped into something real. Malcontent but too lazy to struggle for a change i rather sit at home talking to a friend while this ecological system gets deranged it is so strange i just sit here and thinking that Im not the one to blame. i wonder what it will take to realize our own mistakes. Were too busy with our jobs and with ourselves we just blame it all away. All this love and all this pressure from outside, i put my head in the sand and hide, while this ecological system gets deranged its so strange i just sit here and thinking Im not the one to blame it is so strange how stupid some people can get, they have no respect for nature.
