Razorblade

Razor blade, I got myself a razor blade I got myself a razor Makes me strong enough to face her Razor blade, I got myself a razor blade

Razor blade, I got myself a razor blade I'll let you count my stitches Let you know how much it itches Razor blade, I got myself a razor blade Don't need a switchblade or a knife To deprive someone their lives

Come take a walk with me I got something you must see Don't let the moment fade While I take out my razor blade

Razor blade, I got myself a razor blade Even though it cuts real deep It still wont make you weep Razor blade, I got myself a razor blade Don't need a time bomb or a gun If we're going to have some fun Don't have to slash your wrist Just to prove that you exist Look at this scars it made While I take out my razor blade Randy
